

START TALKING! Building a Drug Free Future

Parent and Teacher Programs:

Parents360x is a presentation for parents about the dangers of prescription drug abuse and their children. There is an 11 minute video, handouts, and the full presentation run time is moldable from 20 minutes to an hour.

****This is great for parent teacher conference night or to even add to your website**

KNOW! Parent tips is an e-mail tip list for parents with how to talk to your children, how to make your home safe, etc.

****Both those programs can easily be integrated into orientations and/or parent teacher conferences. Parents just need to sign up to receive the emails, no additional work on the schools part.**

Teachable Moments is an e-mail tip list for teachers on how to talk to their students about the dangers of drugs and alcohol, what they should say if a student comes to them regarding this topic, etc.

****Teachers can easily sign up for this at In-Service/Training days. No additional work on the schools part.**

Student Programs :

5 Minutes to Life which is geared towards high school athletes and the leaders of the school which shows what drugs can do to a person's body and to remind them that they are the leaders of their school and everyone looks up to them.

****It can be completed in 5 Minutes plus discussion time by an Ohio State Patrol Trooper. The trooper can do a version for any grade though that is tailored to the audience and wants of the school.**

HOPE (Health and Opioid Abuse Prevention Education) Curriculum that has been created in response to House Bill 367 which "requires Ohio schools to select a health education curriculum that includes instruction on the dangers of prescription opioid abuse with an emphasis on the epidemic, and connection of prescription opioid abuse and addiction to other drugs, such as heroin." This is a K-12 curriculum with lessons for each ODE suggested grade band that is to be used as a supplement with the drug and alcohol curriculum already being used. Grades K-5 are designed for implementation with the English Language Arts teachers, and the middle school and high school curriculum are designed for implementation with the licensed health education teacher. The curriculum comes with 3 lesson plans each with 2 additional enhancement lessons, power points, worksheets, videos, and teacher manuals.

These programs can all be adapted specifically to what the district wants and needs.

Information regarding all of these programs can be found at:
